### **DETAILED ACTION**

1. This action is responsive to communications: Amendment, filed on 12/21/07.

This action is made **FINAL**.

2. Claims 2, 3, 5-6, 8-9 and 11-12 are pending in the case. Claims 2, 5-6, 8 and 11 are independent claims. Claims 5-6 have been amended. Claims 1, 4, 7 and 10 are cancelled.

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 5-6, 8, 9, 11 and 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Regarding claims 5 and 6, Applicant's Specification does not provide support for a computer readable medium. Regarding claims 8, 9, 11 and 12, Applicant's Specification/Drawings fail to provide adequate support and description of physical hardware regarding the various "means" and "components, subcomponents" as specified in the claims. Applicant's Specification discloses using display processor for rendering an image to the usable portions of the

display (p. 6) and an algorithm for determining the trapezoids defining the usable portions of the display (p. 5), but provides no structural relationship of elements. Thus, Applicant's Specification fails to provide support for "components, subcomponents" and Applicant's claims provide a system implemented via a single means as the "components, subcomponents" respectively refer to the display processor and the program.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 5-6 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 5-6 respectively claim "a program product" which is representative of descriptive material without any functional interrelationship in the absence of the Specification's disclosure of a computer readable medium. Thus, a program is not a process, machine, manufacture or composition of matter and does not fall within one of the four statutory classes of § 101.

### ***Response to Arguments***

4. Applicant's arguments filed 6/5/08 have been fully considered but they are not persuasive.

5. Applicant's Specification discloses using display processor for rendering an image to the usable portions of the display (p. 6) and an algorithm for determining the trapezoids defining the usable portions of the display (p. 5), but provides no structural relationship of elements. Thus, Applicant's Specification fails to provide support for "components, subcomponents" and Applicant's claims provide a system implemented via a single means as the "components, subcomponents" respectively refer to the display processor and the program.
6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
